Education

Marathwada Mitra Mandal's College Of Engineering 2022 – 2026
Bachelor Of Engineering in Computer Engineering *CGPA: 9.05/10*

Skills

- **Backend**: Java, Spring Boot, RESTful APIs, MySQL
- **Frontend**: HTML, CSS
- **Subject**: OOP in Java, Data Structures and Algorithms (Arrays, Strings)

Experience

Coding Granth Jan 2025 - July 2025
Java Intern *In-Office*

- Explored the fundamentals of Spring Boot and RESTful API development.
- Contributed to the development of an Online Book Store web application.
- Implemented backend services using Java and Spring Boot framework.
- Integrated RESTful APIs for seamless client-server communication.

Projects

UEBA: User and Entity Behavior Analytics Sept 2025

- Developed and implemented an Isolation Forest-based anomaly detection model for UEBA, training on extensive log datasets to identify abnormal user and entity behaviors with a classification accuracy of 62%.
- Designed and optimized feature engineering pipelines converting raw security logs into meaningful numerical features, enhancing model sensitivity to identify suspicious activities while reducing false positives by 20%.
- Integrated the Isolation Forest model into the security operations workflow to provide real-time anomaly scores and risk assessments, enabling a 30% faster incident response through automated detection of cybersecurity threats.

Blockchain-based Patient Record Management System [View] August 2025
Java, Spring Boot, Blockchain, REST APIs

- Developed a blockchain-powered backend system enabling secure, tamper-proof storage and decentralized access to patient records through optimized REST APIs handling 50+ transactions daily
- Implemented robust role-based access control for doctors, patients, and administrators to ensure only authorized users can view or edit sensitive medical data.

Blockchain-based Voting Application February 2024
Solidity, Ethers.js, MetaMask, HTML, JavaScript

- Designed and developed a blockchain-based e-voting platform to provide a secure, transparent, and tamper-proof voting system, ensuring complete data integrity throughout the election process.
- Implemented smart contracts for automated vote validation, candidate registration, and real-time result computation, achieving 100% accuracy and end-to-end transparency.
- Conducted pilot testing with 50+ participants during college club elections, successfully demonstrating reliability, scalability, and ease of use in a real-world voting scenario.

Online Book Store Application[View] February 2025
Java, Spring Boot, REST APIs, MySQL

- Developed a full-stack online book store application using Spring Boot, providing a secure and interactive platform for users to browse, purchase, and manage books efficiently.
- Designed and implemented RESTful APIs for user authentication, product catalog management, and order processing, handling 35+ concurrent user interactions reliably.

Volunteering

Java Workshop - PICT College

∗ Conducted and led a Java Basics workshop for students of PICT College, Pune as part of club activities, personally teaching core programming concepts and guiding participants through hands-on exercises.

Honours & Awards

∗ Secured 1st Prize in the B.E. Project Competition at MMCOE for the UEBA (User and Entity Behavior Analytics) project.
∗ Selected as one of the Top 3 groups in the college for Avishkar Competition, earning the opportunity to represent MMCOE at the SPPU-level competition.
