Professional Summary

Detail-oriented Computer Engineering student with hands-on experience in backend development using Java and Spring Boot. Currently working as a Java Intern at Coding Granth, contributing to real-world application development. Skilled in building RESTful APIs, working with relational and non-relational databases (MySQL, MongoDB), and applying object-oriented principles to solve complex problems. Experienced in developing academic projects involving blockchain integration and full-stack architecture.

Skills

Frontend: HTML, CSS
Backend: Java, Exploring Spring Boot, RESTful APIs, MongoDB, MySQL
Subjects: Data Structures & Algorithms, Software Engineering, OOP in Java, DBMS, Web Technologies, DSBDA

Education

10th, 11th, 12th March 2020 – March 2022

- 10th Marks : 93%
- 12th Marks: 75%

Marathwada Mitra Mandal's College of Engineering (MMCOE), B.E. in Computer Engineering, SPPU Nov 2022 – May 2026

- SGPA:First Year : 8.8 / 10
- SGPA:Second Year : 8.8 / 10
- SGPA:Third Year : 9.05 / 10

Experience

Java Intern, Coding Granth – Remote Jan 2025 – Sept 2025

- Explored the fundamentals of Spring Boot and RESTful API development.
- Contributed to the development of an Online Book Store web application.
- Implemented backend services using Java and Spring Boot framework.
- Integrated RESTful APIs for seamless client-server communication.

Projects

Online Book Store Application GitHub

- Developed a full-stack online book store using Spring Boot.
- Built RESTful APIs for user authentication, product catalog, and order management.
- Integrated MySQL database and implemented CRUD operations.
- Tools Used: Java, Spring Boot, REST APIs, MySQL

Blockchain-based Voting Application GitHub

- Designed and implemented a secure and transparent e-voting system using blockchain with my team mates.
- Ensured tamper-proof vote recording and verification through cryptographic hashing.

Blockchain-based Patient Record Management System (Ongoing)

- Developing a blockchain-powered application to securely manage patient records.
- Features include tamper-proof record storage, decentralized access, and audit logging.
- Tools Used: Java, Spring Boot, Blockchain, REST APIs
